Education

Full Stack Web Development, TrueCoders

Aug 2022 - Oct 2022

TrueCoders is a 9-week remote program, led by expert instructors, focusing on full-stack web development through project-based learning using multiple programming languages.

Coursework

- Project-based technical training in full-stack web development
- Languages learned: HTML, CSS, JavaScript, React, Express, Node, and SQL
- Used SQL for database manipulation
- Had maximum exposure to version control using git and GitHub

Google UX/UI Design Certificate, Coursera

June 2021 - March 2022

Completed rigorous training designed for entry-level job readiness. 15 modules included topics like UX research fundamentals, inclusive design, low-fidelity and high-fidelity prototypes, and tools like Figma and Adobe XD. Completed hands-on projects and developed a portfolio including 3 projects to receive the certificate.

Coursework

- Learned foundations of user experience design
- Build Wireframes and low fidelity Prototypes
- Created high-fidelity designs and prototypes in Figma and Adobe XD

Projects

Eat Salad Restaurant Website

Designed and developed a dynamic restaurant website, "Eat Salad," utilizing WordPress as the content management system and Figma for the design. Successfully combined culinary aesthetics with web expertise to create an engaging online platform that showcases healthy dining in a visually appealing manner.

- Leveraged WordPress to implement the website, allowing for easy content management and updates.
- Implemented HTML, CSS, and, JavaScript
- Had maximum exposure to version control using git and GitHub

Sweet Indulgence Bakery Website

Designed and developed a visually appealing and functional website for Sweet Indulgence Bakery. Used Figma to design the website and integrated e-commerce capabilities into the WordPress platform, enabling seamless online ordering and payment processing for products on the website.

- Utilized Figma to design a visually appealing and cohesive user interface, creating a delightful online experience for customers.
- Implemented WooCommerce and Stripe so customers can order online using various payment methods.
- Optimized the website for mobile devices and desktops to ensure a seamless browsing and shopping experience

Manage Landing Page

Designed and developed a responsive landing page using WordPress, enhancing user experience with custom JavaScript coding for a dynamic navigation bar. Achieved seamless navigation across various devices, ensuring an intuitive and user-friendly interface.

- I used JavaScript to create a responsive navigation bar.
- Enhanced website performance for mobile and desktop devices, ensuring a smooth and uninterrupted browsing experience.

Human Resources Email Newsletter

Crafted a responsive HTML email utilizing the Maizzle framework, enabling swift and efficient development for email campaigns.

- Used maizzle email framework to develop HTML emails quickly.
- Designed and developed HTML that is responsive and compatible with all devices.

Wardrobe Wave Transactional Email

Crafted a responsive HTML email utilizing the Maizzle framework, enabling swift and efficient development for email campaigns. Used Figma to design for mobile and desktop devices.

- Used maizzle email framework to develop HTML emails quickly.
- Used Litmus and Testi to make sure emails display correctly and functions as intended for all various email clients and devices.
